ABmag not documented on units page #8244

Edit New issue

Open parejkoj opened this issue on Dec 6, 2018 · 2 comments

Member + ...

The `ABmag` unit is mentioned twice on the [logarithmic units page](#), but has no documentation and is not even mentioned on the [main units page](#).

@pllim made sure that the new [photometry units documentation](#) got into the release.

@mhvk was mentioned as who to contact about getting ABmag documented there.

pllim added `units` `Docs` labels on Dec 6, 2018

mhvk commented on Dec 6, 2018

Member + ...

Indeed, we now at least include <http://docs.astropy.org/en/latest/units/index.html#module-astropy.units.photometric> - but that doesn't mention any of the `mag*` actual logarithmic units.
